<b>Hydrogen Application</b>	
Category	Transport and distribution of hydrogen
Application	Road transport; Cylinders and tube trailers Bulk Gas / Metal Hydride / Bulk Liquid
↳ Definition:	The transport of hydrogen in conventional gas tank, metallic cylinders and composite vessels on the road.

<b>Description: LAP</b>		
<b>LAP</b>	LAP 4: Quantity and Pressure limitation	
↳ Definition	Maximum quantity and/or pressure of gases which is allowed to be transported.	
	<b>GUIDANCE COLUMN</b>	<b>ANSWER COLUMN</b> <i>(answer in fields below)</i>
<b>Type of LAP</b>	<p>[Select the applicable aspect(s) related to the legal administrative process]</p> <p>Can probably be done centrally (could be the same in all countries) depending on if there is a European LAP</p> <p><b>Definitions:</b>  <i>Substantial Requirement:</i>            Substantial legal-administrative requirement based on a particular characteristic of the FCH application: type approval, quality requirements etc.</p> <p><i>Process (for the deployment of fuel cell hydrogen):</i>            One of the necessary functional procedures necessary to deploy a FCH technology such as permitting license, permission for grid connection. A process is described by a sequence of process steps (which may either be of administrative or non-administrative nature) e.g. with the permitting process. The process usually can be quantified in time and costs            Process steps: a step is one of sequential succession of actions that need to be executed, in order to satisfy the legal administrative and other requirements of the process.</p>	<input type="checkbox"/> Substantial requirement <input type="checkbox"/> Process <input type="checkbox"/> Other: ↳ <a href="#">Click here to enter free text.</a>
<b>LAP description (questions)</b>	Question 1 What are the pressure requirements and limitations accepted for hydrogen transport?	<a href="#">Click here to enter free text.</a>
	Question 2 What are the quantity requirements and limitations accepted for hydrogen transport?	<a href="#">Click here to enter free text.</a>

	<p>Question 3 Is it possible to increase the pressure/quantity?</p> <p>a) which authority is competent? b) what is the process to follow? c) how long does it take? d) what are the costs associated?</p>	<p><a href="#">Click here to enter free text.</a></p> <p>a – <a href="#">Click here to enter free text.</a> b – <a href="#">Click here to enter free text.</a> c – <a href="#">Click here to enter free text.</a> d – <a href="#">Click here to enter free text.</a></p>
	<p>Describe the comparable technology and its relevance with regard to hydrogen</p>	<p><a href="#">Click here to enter free text.</a></p>

<b>Assessment: LAP</b>	<p><i>This will be done mainly after the finalization of WP4, which is the analysis of the data, but it is useful to collect this information. Please indicate the assessment where possible.</i></p>	
	<b>GUIDANCE COLUMN</b>	<b>ANSWER COLUMN</b> <i>(answer in fields below)</i>
	Description of the impact of the LAP	<a href="#">Click here to enter free text.</a>
	Is it a barrier?	<input type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Neutral <input type="checkbox"/> Beneficial

	<p>Type of barrier?</p> <p>Description:</p> <p><b>Structural barrier:</b> The barrier is created by a non-adapted regulation which prevents or seriously hinders the deployment of the FC or H2 application. The removal of this barriers requires a change of regulation. Solutions to structural barriers might take a long time before being implemented (the higher the level of the rule in the hierarchy of norm, the more difficult it is to adapt it.</p> <p><b>The operational barrier:</b> An operational barrier can be resolved in the execution. The legislation does not need to be adjusted accordingly, but rather only to be implemented by industry, local authorities and executive organizations involved for licensing, grants, monitoring or other procedures.</p> <p><b>Economic barrier:</b> An economic barrier is linked to associated costs that are too high to allow any market entry</p> <p><b>Regulatory gap:</b> A regulatory gap is the absence of specific regulations on a topic, which creates uncertainty about the applicable regulation since it is not harmonized and aligned. This may lead to the implementation of diverse rules according to the various interpretations of national legal authorities, (and may have an impact on the time, costs etc.)</p>	<input type="checkbox"/> Structural barriers <input type="checkbox"/> Operational barriers <input type="checkbox"/> Economic barriers <input type="checkbox"/> Regulatory gap
	<p>Severity (1 is lowest severity, 10 is highest)</p>	<p>Enter value ranging from 1-10</p>
	<p>Implication of barrier (free text)        ↳ (e.g. time, cost, duration)</p>	<p>Click here to enter free text.</p>
